

SELECTED PUBLICATIONS

- Hausdorff operators on Hardy spaces*, Eurasian Math. J. **4** (2013), 101-141.
- Fourier transforms on an amalgam type space*, Monatsh. Math. **172** (2013), 345-355.
- On a Hardy-Littlewood theorem*, Bull. Inst. Math. Acad. Sinica (New Series) **8** (2013), 481-489 (with U. Stadtmüller).
- Almost everywhere convergence of Fourier integrals revisited*, Archiv Math. **100** (2013), 287-292 (with Chang-Pao Chen).
- A Multidimensional Euler-Maclaurin Formula and an Application*, Complex Analysis and Dynamical Systems V, Contemporary Math. **554** (2013), 83-98 (with U. Stadtmüller).
- Absolute convergence of multiple Fourier integrals*, Studia Math. **214** (2013), 17-35 (with Yu. Kolomoitsev).
- Almost everywhere convergence of Fourier integrals revisited*, Archiv der Math. **100** (2013), 587-592 (with Chang-Pao Chen).
- Fourier transform versus Hilbert transform*, Ukr. Mat. Visn. **9** (2012), 209-218; also in J. Math. Sci. (N.Y.) **187** (2012), 49-56.
- The Wiener algebra of absolutely convergent Fourier integrals: an overview*, Anal. Math. Phys. **2** (2012), 1-68 (with S. Samko and R. Trigub).
- Two-sided weighted Fourier inequalities*, Anal. Sc. Norm. Super. Pisa Cl. Sci. (5) **11** (2012), 341-362 (with S. Tikhonov).
- Weighted Fourier inequalities: Boas' conjecture in \mathbb{R}^n* , J. Anal. Math. **114** (2011), 99-120 (with D. Gorbachev and S. Tikhonov).
- A concept of general monotonicity and applications*, Math. Nachr. **284** (2011), 1083-1098 (with S. Tikhonov).
- An interplay of multidimensional variations in Fourier analysis*, J. Fourier Anal. Appl. **17** (2011), 226-239 (with U. Stadtmüller and R. Trigub).
- Conditions for the absolute convergence of Fourier integrals*, J. Approx. Theory **163** (2011), 438-459 (with R. Trigub).
- Extending tests for convergence of number series*, J. Math. Anal. Appl. **377** (2011), 194-206 (with S. Tikhonov and M. Zeltser).
- On absolute convergence of Fourier integrals*, Real Anal. Exchange **36** (2010/11), 353-360.
- Weighted Paley-Wiener theorem on the Hilbert transform*, C. R. Math. Acad. Sci. Paris **348** (2010), 1253-1258 (with S. Tikhonov).
- On the Representation of a Function as an Absolutely Convergent Fourier Integral*, Trudy Mat. Inst. Steklov **269** (2010), 153-166 (Russian). - English transl. in Proc. Steklov Inst. Math., **269** (2010), 146-159 (with R. Trigub).

- Uniform convergence and integrability of Fourier integrals*, J. Math. Anal. Appl. **372** (2010), 328-338 (with M. Dyachenko and S. Tikhonov).
- Structural properties of bilateral grand Lebesgue spaces*, Turkish J. Math. **34** (2010), 207-219 (with E. Ostrovsky and L. Sirota).
- Hardy spaces in Reinhardt domains, and Hausdorff operators*, Illinois J. Math. **53** (2009), 1033-1049 (with L. Aizenberg).
- Boundedness of the Hausdorff operators in H^p spaces, $0 < p < 1$* , Studia Math. **194** (2009), 279-292 (with A. Miyachi).
- Necessary conditions for integrability of the Fourier transform*, Georgian Math. J. **16** (2009), 553-559.
- Boundedness of multidimensional Hausdorff operators on $H^1(\mathbb{R}^n)$* , Acta Sci. Math. (Szeged) **74** (2008), 845-851.
- Extended solution of Boas' conjecture on Fourier transforms*, C. R. Math. Acad. Sci. Paris **346** (2008), 1137-1142 (with S. Tikhonov).
- Multidimensional Hausdorff operators on the real Hardy space*, J. Aust. Math. Soc. **83** (2007), 79-86 (with A. Lerner).
- Open problems on Hausdorff operators*, Complex analysis and potential theory, World Sci. Publ., Hackensack, NJ, 2007, 280-285.
- Lebesgue constants of multidimensional Fourier series*, Online J. Anal. Comb. **1** (2006), Art.5, 112 p.
- Multidimensional analogue of the van der Corput-Visser inequality and its application to the estimation of the Bohr radius*, Real Ann. Polon. Math. **80** (2003), 47-54 (with L. Aizenberg and A. Vidras).
- On linear means of multiple Fourier integrals defined by special domains*, Rocky Mountain J. Math. **32** (2002), 969-980 (with A. Nakhman).
- On quasi-monotone functions and sequences*, Comput. Methods Funct. Theory **1** (2002), 345-352.
- Two spaces conditions for integrability of the Fourier transform*, Analysis **19** (2001), 331-366 (with E. Ournycheva).
- The Hausdorff operator is bounded on the real Hardy space $H^1(\mathbb{R})$* , Proc. Amer. Math. Soc. **128** (2000), 1391-1396 (with F. Móricz).
- A family of function spaces and multipliers*, Israel Math. Conf. Proc. **13** (1999), 141-149.
- On the Lebesgue constants of Cesàro means of spherical harmonic expansions*, Acta Sci. Math. (Szeged) **64** (1998), 215-222.
- On asymptotics for a class of radial Fourier transforms*, ZAA **17** (1998), 103-114 (with W. Trebels).
- Approximation in L_∞ on the real line*, Acta Sci. Math. (Szeged) **64** (1998), 171-181 (with I. Joó).
- The Banach algebra A^* and its properties*, J. Fourier Anal. Appl. **3** (1997), 103-129 (with E. Belinsky and R. Trigub).
- Fourier Transforms of Radial Functions*, Integral Transforms and Special Functions **4** (1996), 279-300.
- Estimates of Best Approximation and Fourier Transforms in Integral Metrics*, J. Approx. Theory, **83** (1995), 347-370 (with M. Ganzburg).

Approximation properties in L^p , $0 < p < 1$, *Functiones et Approximatio*, **XXII** (1993), 189-199 (with E. Belinsky).

Fourier transform of functions from certain classes, *Anal. Math.* **19** (1993), 151-168.

The behavior of Lebesgue constants of hyperbolic partial sums, *Mat. Zametki* **43** (1988), 192-196 (Russian). - English transl. in *Math. Notes* **43** (1988), 107-109 (with E. Belinsky).

Some questions of absolute convergence of multiple Fourier integrals, *Theory of functions and mappings*, Naukova Dumka, Kiev, 1979, 110-132, 179 (Russian).
